

Setting Notifications to appear for longer in Windows

Go to **Settings > Accessibility > Visual Effects**

teamSOS

Click on the drop-down options next to **Dismiss notifications after this amount of time**
Select 5 minutes (or the time you would like to change it to)

All notifications will now display for 5 minutes. Notifications display even if the screen is locked. **Note** they will not display if the screen is in sleep mode.

Group Policy

Alternatively you can use your Group Policy to set the notification display time for all machines and you have flexibility to set how long notifications display.

Within your MSI installer, instruct as follows:

Computer\HKEY_CURRENT_USER\Control Panel\Accessibility

DWORD MessageDuration

value is number of seconds
